

INTEGRATION

UNLEASH THE POWER

Prosure360: An Integrated Approach

Unleash the Power of Integrated Platforms to Amplify Visibility, Turbocharge Productivity & Slash Risks.

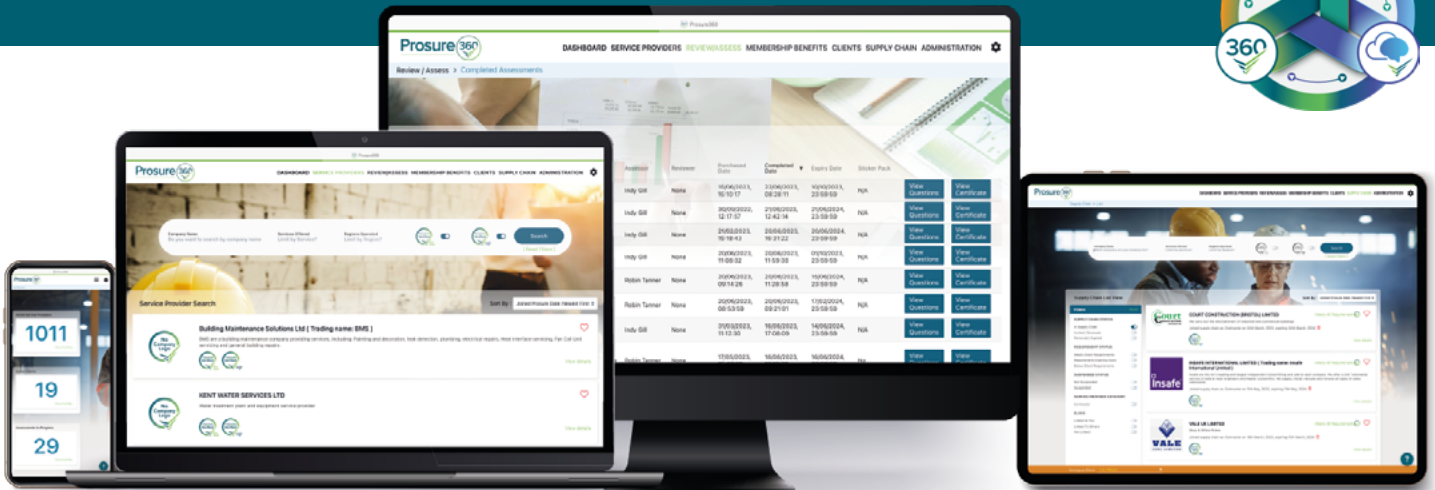

As part of Marlowe Software, Risk, and Compliance (SRC), we understand the challenges organisations face when common data is required across multiple systems, leading to duplication, delay, and error. At Prosure360, we have integrated our supply chain management system with our risk management software, [Meridian](#), as well as [Elogs CAFM system](#).

In doing this, we have combined three of the very best compliance systems, designed to make life easier for our clients. By integrating these three unique systems, we aim to give you unrivalled transparency and unparalleled control.

A video player thumbnail with a blue and green background. At the top left, there is a white corner effect. Three circular icons are arranged horizontally: '360', a grid, and a brain. Below them is a stylized illustration of a city skyline with a tall building labeled 'SRC'. A large red play button is on the right. The text 'Integrated Platforms - Prosure360, Elogs and Meridian' is written in white. At the bottom, there are small icons of people and a dark bar with the Marlowe logo and text 'MARLOWE | Software, Risk & Compliance'.

MARLOWE | Software, Risk & Compliance

What is Prosure360? Your entire supply chain all in one place.

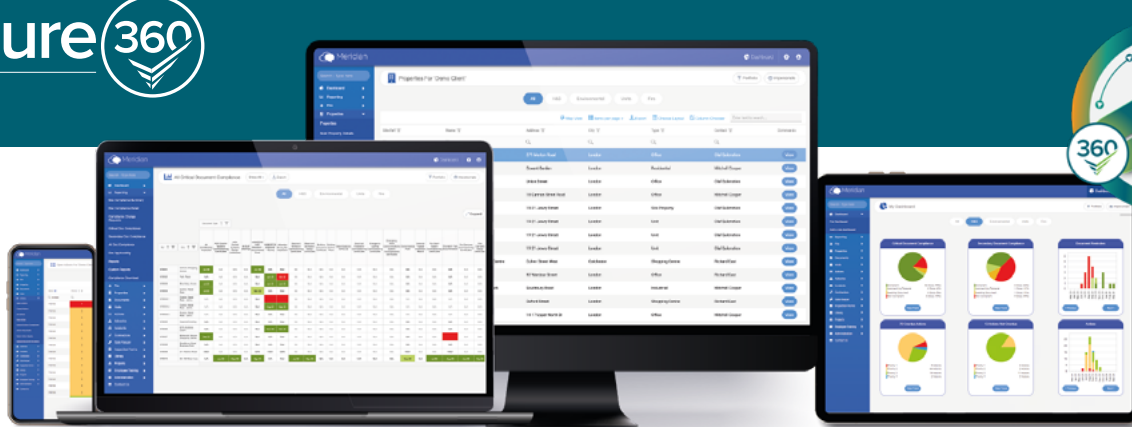

Prosure360 is a supply chain management platform that gives you total visibility of your suppliers and contractors. We empower our clients to gain a comprehensive understanding of their supply chain by providing a traffic light report. This enables them to assess whether their contractors and suppliers meet their specific standards and requirements. Our powerful software will drive efficiencies and streamline operational processes across the supply chain, particularly in relation to supplier performance and selection.

The in-house assessors expertly navigate you through assessments such as Safety Schemes in Procurement (SSIP) and the Prosure360 Pre-Qualification Standard. These assessments cover vital domains such as business and professional standing, equality, diversity, people, and quality management.

The overall goal of Prosure360 is to empower businesses to make an informed choice about who they work with, ensuring the supply chain is made up of qualified, insured, and reliable contractors.

By integrating with Meridian and Elogs CAFM, Prosure360 can help clients manage compliance and track building maintenance, as well as helping them select verified suppliers and contractors.

What is Meridian?

An online compliance and risk management platform that gives you total visibility.

Meridian is another platform from William Martin—a state-of-the-art online risk management software that helps organisations better manage their compliance. Offering full visibility into your health and safety performance, this platform empowers you to cut costs, save time, and simplify compliance management.

With three packages to choose from, Meridian can be tailored to meet your specific business needs. The Enterprise package can integrate with other platforms to help you boost productivity, as well as offering a range of fully customisable modules.

Our integration with this unique software allows you to effectively track and monitor compliance across your property portfolio. Meridian is the ultimate compliance management system that enables you to reduce effort and the burden of managing compliance with disparate and multiple stand-alone processes.

What is Elogs CAFM+ Service Desk?

Property management through the power of people and technology.

Prosure360 is also fully integrated with Elogs CAFM + Service Desk, a cloud-based CAFM solution and branded Service Desk. Used across 22,000+ properties, Elogs are instructed by the world's largest managing agents, property owners, and PLCs in the property and asset management sector. Elogs CAFM+ Service Desk is more than just software, it provides seamless and efficient job management for property and facilities managers.

Elogs Computer Aided Facilities Management (CAFM) system is designed to alleviate the burden of job management and service coordination, freeing up valuable time for facilities managers to focus on strategic initiatives. With 24/7 support, Elogs' dedicated Service Desk team is on hand to ensure that every job is followed through to completion.

Ultimately, our integration with Elogs CAFM can help our clients simplify facilities management, save time, and cut costs.

How do each of these three systems work together?

Our integrated platforms offer a comprehensive 360-degree solution to meet all your compliance and facilities management needs. Any actions identified in risk assessments can be uploaded onto the Meridian platform. To find reliable suppliers and contractors to carry out these actions, you can search for Prosure360 verified suppliers within the Meridian platform. This means you can guarantee that your supply chain is made up of qualified and insured service providers who meet your specific business requirements.

Once you've found the right suppliers and contractors using the Prosure360 tab within the Meridian platform, the action is then pushed into Elogs CAFM as a job or quote request. Next, permits can be raised in Meridian, meaning the service provider is automatically given visibility of hazards before they attend the site. After the service provider picks up the job in Elogs CAFM, they visit the site to complete the job.

The service provider can then update Elogs CAFM, which automatically updates Meridian. Once the job is verified as done, the action can be closed in Meridian—so the cycle is complete.

What are the benefits of these integrations?

Our suite of integrated platforms aims to enhance visibility, increase productivity, and reduce risk. This integrated approach makes it easy to have full visibility of your supply chain, your buildings and assets, and your compliance activities. Ultimately, we want to create a compliance ecosystem that empowers our clients to mitigate risk, improve relationships with suppliers, and manage any number of sites or properties with ease.

Key benefits of our integrated approach:

- Simplified supplier selection process, ensuring you only work with verified service providers.
- Improved cost savings.
- Better time-management.
- Increased efficiency across your business.
- Reduced risk across your property portfolio.
- Enhanced compliance activities.
- Improved property performance.
