

Prosure360 and SSIP Certification

Prosure Deem-to-Satisfy

Where you may already have SSIP with another provider, you can officially record it on Prosure360 via Deem-to-Satisfy.

Prosure SSIP Verified

Gain verification to SSIP standards, demonstrating your commitment to strong health & safety standards.

What is SSIP?

SSIP, Safety Schemes in Procurement, is a membership body which brings together various health and safety schemes. SSIP is not an accreditation, but a certification process which can result in obtaining an SSIP certificate, following an assessment by an SSIP Forum Member.

What is the SSIP certification worth?

The SSIP certification demonstrates a true commitment to health and safety which you can evidence to those you work with.

For our clients, it takes a standardised approach, offering peace of mind that all their service providers adhere to the same core criteria. Since the assessments are validated by qualified professionals, the certification holds a level of credibility.

Once you achieve the SSIP certification, you'll be able to easily evidence your health and safety credentials.

What are the SSIP Republic of Ireland Duty Holder Categories?

Prosure360 provides SSIP assessments which we've now extended to include Republic of Ireland Duty Holder Categories, including:

- SSIP Approved IE
- SSIP Approved IE Contractor
- SSIP Approved IE Project Supervisor Construction Stage (PSCS)

What does this mean for Prosure360 clients?

This will allow clients who have operations in Ireland to have specific SSIP for that operational base, giving them clear visibility between UK and Ireland based service providers.

It also means that businesses who are solely based in Ireland can use Prosure360; this will support clients in building their relationships with service providers as they can choose which SSIP certification is best suited to their organisation.

There are only a handful of SSIP approved providers who can offer this, so Prosure360 is unique because it can deliver the SSIP, specific to the IE market.
